Special Issue

Fracture Scaling

Edited by Z.P. Bažant and Y.D.S. Rajapakse

TABLE OF CONTENTS

Preface vii–viii

Part 1. Micromechanical Analysis

Models of interface separation accompanied by plastic dissipation at multiple scales — Y. WEI and J.W. HUTCHINSON — 1–17

The effects of heterogeneity and anisotropy on the size effect in cracked polycrystalline films — R. BALLARINI, R.L. MULLEN and A.H. HEUER — 19–39

Size effect relations associated with cohesive zone type fracture at a blunt stress concentration — E. SMITH — 41–50

Scaling laws for elastoplastic fracture — A.G. ATKINS — 51–65

Part 2. Size Effects in Fiber Composites

Scale effects in the initiation of cracking of a scarf joints — D. LIU and N.A. FLECK — 67–88

Size effect in fracture of unidirectional composite plates — G.J. DVORAK and A.P. SUVOROV — 89–101

Size effect on compression strength of fiber composites failing by kink band propagation — Z.P. BAŽANT, J.-J.H. KIM, I.M. DANIEL, E. BECQ-GIRAUDON and G. LI — 103–141

Is there a thickness effect on compressive strength of unnotched composite laminates? — I.M. DANIEL and H.M. HSIAO — 143–158

Part 3. Scaling and Heterogeneity

Failure and scaling properties of a softening interface connected to an elastic block	A. DELAPLACE, S. ROUX and G. PIJAUDIER-CABOT	159–174
A Model for predicting grain boundary cracking in polycrystalline viscoplastic materials including scale effects	K.L.E. HELMS, D.H. ALLEN and L.D. HURTADO	175–194
Effect of strain gradients on the size effect of concrete in uniaxial tension	M.R.A. VAN VLIET and J.G.M. VAN MIER	195–219
Scaling phenomena due to fractal contact in concrete and rock fractures	M. BORRI-BRUNETTO, A. CARPINTERI and B. CHIAIA	221–238
Fractals and fractal scaling in fracture mechanics	F.M. BORODICH	239–259

Part 4. Computational Aspects and Nonlocal or Gradient Models

A unified framework for concrete damage and fracture models including size effects	R. DE BORST and M.A. GUTIÉRREZ	261–277
Finite element simulation of ring expansion and fragmentation: The capturing of length and time scales through cohesive models of fracture	A. PANDOLFI, P. KRYSL and M. ORTIZ	279–297
Strain gradient interpretation of size effects	E.C. AIFANTIS	299–314
Use of neural networks for fitting of FE probabilistic scaling model parameters	E.M.R. FAIRBAIRN, C.N.M. PAZ, N.F.F. EBECKEN and F.-J. ULM	315–324

Part 5. Size Effects in Concrete, Ice and Soils

Scale effects on the *in-situ* tensile strength and fracture of ice. Part I: Large grained freshwater ice at Spray Lakes Reservoir, Alberta	J.P. DEMPSEY, S.J. DEFRANCO, R.M. ADAMSON and S.V. MULMULE	325–345
Scale effects on the *in-situ* tensile strength and fracture of ice. Part II: First-year sea ice at Resolute, N.W.T.	J.P. DEMPSEY, R.M. ADAMSON and S.V. MULMULE	347–366
Size effect and inverse analysis in concrete fracture	J. PLANAS, G.V. GUINEA and M. ELICES	367–378
Size effect in shallow and deep notched quasi-brittle structures	B.L. KARIHALOO	379–390

Size effect on the concrete cone pull-out load	J. OŽBOLT, R. ELIGEHAUSEN and H.W. REINHARDT	391–404
Fracture and size effect characters of cemented sand	S. STURE, A. ALQUASABI and M. AYARI	405–433
Author index		435
